CGYPP 2016 TOPIC:

SOCIETY AT RISK - CZECH AND GERMAN ANSWERS

The technological advancements in Information and Communication Technologies lead to a dense tissue of economic, political and economic ties that span across national borders and physical barriers. Although for many centuries, Germany and the Czech Republic have shared history and culture, it was their full integration into the globalized world after 1989 that, through intensified economic and trade relations, shifted their links to a whole new level. Current challenges presented by an increased interconnectedness are serious tests for the European integration. What are Czech and German responses?

You will explore various aspects of political and social appeals and its various dimensions and compare German and Czech strategies in economic, political and social terms. By exchanging your experiences and visions, you will contribute to a discussion on how do Czech and Germans look toward future. Inspired by new ideas, tools and contacts, you will have a chance to benefit from the program in your individual professional and private life.
